EPA, REGION V

AMLAND FACILITY MEETING
AUGUST 6, 1992

Staff met with Amland representatives and their consultant Geraghty & Miller to discuss the Notice of Deficiency issued by the Department on May 20, 1992.

However, since Amland intends to withdraw their post-closure permit application, specific issues relating to the NOD were not discussed.

Staff informed facility representatives that if it were later determined that a post-closure permit was necessary, Amland would still be required to respond to the NOD.

Robert Martin
